Typical cyclodextrins are constituted by 6-8 glucopyranoside units. These subunits are linked by 1,4 glycosidic bonds. The cyclodextrins have toroidal shapes, with the larger and the smaller openings of the toroid exposing to the solvent secondary and primary hydroxyl groups respectively.

Cyclodextrin - Wikipedia

Natural food additives are reviewed in detail. A basic background of synthetic additives and their role in food is overviewed. Natural antimicrobials, antioxidants, sweeteners and colorings are focused.

Natural food additives: Quo vadis? - ScienceDirect

L'astaxantina è un carotenoide di colore rosso-violaceo. È presente, insieme ad altre molecole antiossidanti, nell'olio di krill (*Euphausia superba*).

Astaxantina - Wikipedia

The Raman spectra of 10 samples containing the mineral pigeonite, a Ca-poor P21/c pyroxene, were measured. Seven of the studied samples come from the achondritic meteorites belonging to the family of ureilites, two are from volcanic rocks, and one is synthetic.

Coloration. In flowers, the coloration that is provided by anthocyanin accumulation may attract a wide variety of animal pollinators, while in fruits, the same coloration may aid in seed dispersal by attracting herbivorous animals to the potentially-edible fruits bearing these red, blue, or purple colors.

Anthocyanin - Wikipedia

Wild carrot has a small, tough pale fleshed bitter white root; modern domestic carrot has a swollen, juice sweet root, usually orange. Carrots originated in present day Afghanistan about 5000 years ago, probably originally as a purple or yellow root.
