EVOLUTION: the "Revolution" in Optical Sorting. Both the human eye and the EVOLUTION RGB detect color through three wavelengths (red, green and blue), allowing the sorter to match the eye's ability to see true color.

Satake EVOLUTION Optical Sorting Technology

Itâ€™s become extremely obvious, especially within the past few years, that Earthâ€™s dependence on fossil fuels is not needed at all. Yet we continue to create war, destroy the environment and harm mother Earth so we can continue using the same old techniques that generate trillions of dollars for those at the top of the energy industry.

Multiple Scientists Confirm The Reality of Free Energy ...

Variation and Disease. A major focus of our lab is understanding the effects of genetic variation on molecular phenotypes and human disease. We develop methods for integrating diverse functional genomic datasets of transcription, chromatin modifications, regulator binding, and their changes across multiple conditions to interpret genetic ...
